Date.: 22.04.2019

Ministry of Investment and Foreign Trade of Republic of Uzbekistan

For the kind attention of Mr. Minister,

Dear Sir,

It is our great pleasure to take a fraction of your precious time to introduce Tahviah as the oldest established and largest fully private air conditioning equipment designer and manufacturer in Iran and one of the leaders in the industry which has been established in 1964 as the contractor of mechanical systems and successfully built its way to the continuing achievement in assembling the HVAC system by using the production line of Airtemp and Trane.

After moving to the present factory in Alborz Industrial Estate in Qazvin/Iran in 1975, Tahviah accomplished every day in a way to receive licence from the world's major industrial companies in this filed namely Chrysler and Airtemp of the United States of America in Iran.

After revolution, some changes happened in 1986 which caused the compilation of new policies on the basis of improved and expansion of Tahviah as the leading HVAC manufacturer in Iran and then production and presentation of new air conditioning equipment in 2013, Tahviah has begun the second half-century of its glorious presence in air conditioning industry and in addition to the previous products, it initiates manufacturing new products. By the end of the first half of 2016, Tahviah together with its sister companies (factories) located in Golpayegan, Qazvin, and Sirjan encouraged to manufacture and supply fan coil, chiller, air handling units, package air conditioning, different types of splits such as duct splits, mini chiller, electrical panel cooler, room air conditioning products, ice cream makers and air conditioning systems for automotive and rail industries.

On the strength of over five decades of experience and being a member of international refrigeration institute (IIR) and also equipped with the latest methods of technologies, modern production lines and mobilizations, Tahviah managed to win the confidence of those major clients in most of the residential, commercial and national projects with taking advantages of modern manufacturing facilities, having an area of 110.000 m² and around 730 employees have found enhanced Tahviah's capability in proudly advance cooling solution for diverse needs.

عضو انجمن صنعت تاسیسات ایران
