

Investment projects developed based on the results of the analysis of the economic potential of the Kashkadarya region

№	Region	Project name	Capacity		Project cost (million dollars)	Jobs	IRR (%)	PP	Note
			measurement	quantity					
201					838,4	8 550,0	25,0		
	Kashkadarya region								
1	Kashkadarya region	Setting up the production of plastic containers	thousand tons	4	5,3	37	18,3	52	There are structural raw materials for the production of this type of product on the territory
2	Kashkadarya region	Establishing the production of specialized containers for beverages	of pieces	480	1,3	50	129	22	There are structural raw materials for the production of this type of product on the territory. High demand, as well as the lack of investment projects in this direction.
3	Kashkadarya region	Producing one-time use tableware	thousand pieces	12,1	0,4	10	20,6	16	There are structural raw materials for the production of this type of product on the territory. High demand, as well as the lack of investment projects in this direction.
4	Kashkadarya region	Production of construction materials (processing sand-gravel mixtures)	thousand m.cubic	801,2	4,2	259	142,4	14	There are 3 sand and gravel deposits in the area with a total reserve of 722.6 thousand tons
5	Kashkadarya region	Organizing the production of partition blocks	thousand pieces	14,4	3,0	171	11	39	There is a pure stone deposit with reserves of 2.3 million tons on the territory of the district
6	Kashkadarya region	Organizing the production of cement products	thousand tons	20	30,0	122	26	61	There are spare stones in the area
7	Kashkadarya region	Paint production	thousand tons	1	0,5	8	24,71	19	There is no enterprise producing these products in the region, the demand is high
8	Kashkadarya region	Processing marble and onyx, organizing the production of decorative dry mixtures.	thousand sq.m	35,7	0,8	15	33,7	25	For the production of this type of product, there are reserves of 110.3 thousand tons in the territory

9	Kashkadarya region	Organization of production of reinforced concrete products	. thousand pieces	1,3	0,5	25	45	31	. There are 3 sand and gravel deposits with reserves of 722.6 thousand tons, which are used as raw materials for the production of this type of product
10	Kashkadarya region	Organization of production of corrugated cardboard and cardboard packaging	thousand p/m	18,7	1,2	30	59,1	37	There are structural raw materials for the production of this type of product on the territory
11	Kashkadarya region	Processing plastic waste and organizing the production of granules	thousand m.cubic	27,9	2,0	32	62	30	There are structural raw materials for the production of this type of product on the territory
12	Kashkadarya region	Production of thermal insulation materials (mineral wool) from dolomite raw materials	thousand m.cubic	131	1,3	35	22,5	33	For the production of this type of product, there are reserves of raw materials in the amount of 29.1 thousand tons on the territory
13	Kashkadarya region	Organization of Samorez (rotary screws) production	tons	100	0,9	31	21	60	High demand, as well as the lack of investment projects in this direction.
14	Kashkadarya region	Organization of production of asphalt mixes and blocks	thousand tons	4,5	0,1	12	47	30	There are deposits in the area with reserves of 722.6 thousand tons of raw materials for the production of these products
15	Kashkadarya region	Organization of production of building materials (decorative tiles).	thousand sq.m	2	26,3	120	11,4	51	There are deposits in the area with reserves of 722.6 thousand tons of raw materials for these products
16	Kashkadarya region	Mix production organization	. thousand pieces	2,5	0,7	10	11,6	60	High demand, as well as the lack of investment projects in this direction.
17	Kashkadarya region	Organization of production of pet containers	million pieces	116,8	14,4	159	18	75	Dolomite deposits for glass production are located on the territory of the district
18	Kashkadarya region	Production of polypropylene (salafan) products	thousand tons	5,24	0,5	35	141	14	The presence of demand and the absence of investment projects in this direction.

19	Kashkadarya region	Organization of production of wooden houses with frame panels	thousand sq.m	18	0,4	40	73	29	There is a high demand in the area for easily assembled mobile homes that are easy to move, and there are no businesses producing this type of product
20	Kashkadarya region	Organization of soft furniture production	pieces	960	0,3	13	18,43	58	In 2022, furniture products worth 545.2 million soums were produced
21	Kashkadarya region	Establishment of a milking complex for 1,000 dairy cows	tons	108	23,0	25	13	48	This project was recognized as promising due to the presence of 117.4 thousand heads of cattle in the area
22	Kashkadarya region	Organization of production of baby food (porridge for baby's first feeding).	thousand tons	1,1	5,5	104	19,4	77	There are no manufacturers in the region in this direction, but there is material and demand
23	Kashkadarya region	Establishment of a goat farm and milk processing cluster	tons	85	22,6	62	36	51	There are 378 thousand heads of sheep and goats in the district
24	Kashkadarya region	Organization of production of semi-hard cheeses (ricotta, maazdam, etc.).	thousand tons	2	7,3	35	26	15	Milk is grown in the area of 102.8 thousand tons per year 102.8 thousand tons of milk are produced in the district per year
25	Kashkadarya region	Organization of complete processing of dairy products	thousand tons	16	5,6	124	109	26	There is a demand for soft drinks.
26	Kashkadarya region	Organization of production of soft drinks (beer and soda).	million liters	21	5,0	54	29,3	36	There are structural raw materials for the production of this type of product on the territory. Last year, 26.0 thousand tons of cotton were produced
27	Kashkadarya region	Organization of production of refined vegetable oil (linseed and other products).	thousand tons	121	5,6	23	12,9	56	High demand, as well as the lack of investment projects in this direction.
28	Kashkadarya region	Production of noodles, lagmon	million pieces	12	1,3	35	42,4	29	The district specializes in agriculture, so there are all possibilities for the implementation of this project

29	Kashkadarya region	Organization of production of tomato juice and pumpkin nectar	thousand tons	15	0,5	35	76,9	28	10 thousand tons of potatoes were grown in the district in 2022
30	Kashkadarya region	Production from secondary products (potatoes, carrots, fruits, etc. chips and other products).	thousand tons	17	8,8	90	48	40	High demand, as well as the lack of investment projects in this direction.
31	Kashkadarya region	Organization of production of cultured water and other types of beverages	thousand liters	300	0,3	30	14	26	The region has structural raw materials for the production of this type of product, and there are no alternative producers in the province
32	Kashkadarya region	Production of hay and fodder pellets and animal feed by artificial drying of alfalfa	thousand tons	83,7	15,6	58	24	72	High demand, as well as the lack of investment projects in this direction.
33	Kashkadarya region	Organization of production of mixed fodder for livestock and poultry	thousand tons	12,8	2,0	50	16	60	High demand, as well as the lack of investment projects in this direction.
34	Kashkadarya region	Organization of the production of children's hygiene products	thousand tons	104	2,7	12	16,1	60	High demand, as well as the lack of investment projects in this direction.
35	Kashkadarya region	Organization of production of packaged tea	thousand tons	1,2	4,3	108	29	72	There are no producers in the region in this direction, but there are raw materials and demand
36	Kashkadarya region	Organization of tarpaulin (PVC) fabric production	thousand tons million sq.m	3	4,8	30	173	18	There are structural raw materials for the production of this type of product on the territory
37	Kashkadarya region	Organization of processing and packaging of medicinal plants.	tons	208	1,1	15	17,3	60	There is a regional structural raw material for the production of this type of product and there is no alternative enterprise
38	Kashkadarya region	Organization of production of injection (syringe, etc.) kits	million pieces	1,2	20,7	97	28,3	51	There are structural raw materials for the production of this type of product on the territory

39	Kashkadarya region	Leather processing and production of leather products	thousand pieces	60	2,1	27	14,9	60	High demand, as well as the lack of investment projects in this direction.
40	Kashkadarya region	Organization of sheep and goat wool processing	thousand sq.m	916	5,7	40	18,7	60	About 14-15 thousand tons of meat are produced in the region, and domestic consumption is 10-12 thousand tons. The product is in demand in the domestic market. The quality of animal skins slaughtered in the poultry house is also improved.
41	Kashkadarya region	Production of canned meat	million pieces	4,5	1,8	30	35,5	40	An electric generator is a device that converts mechanical energy into electric current, and an electric motor is a device that performs mechanical work based on electric current. Given the presence of large enterprises and small industrial zones in the district and neighboring regions, there is demand for this product in the domestic market.
42	Kashkadarya region	Production of various generators	thousand pieces	5,1	3,7	80	17,9	52,8	Along with imports, domestic products are used. Imports of products from Russia and China are decreasing.
43	Kashkadarya region	Production of prosthetic and orthopedic products	thousand pieces	10	0,7	25	8	60	The reserves of dolomite rock amount to 113577.0 thousand tons. Given the presence of large construction projects in the Kashkadarya region and neighboring regions, this product is in great demand in the domestic market.
44	Kashkadarya region	Production of decorative facing stone from dolomite	thousand tons	25	2,2	20	13,8	56,4	The reserves of dolomite rock amount to 113577.0 thousand tons. Considering that intensive construction of houses and buildings is underway in the Kashkadarya region, as well as in neighboring regions, it can be seen that this product is in great demand in the domestic market.
45	Kashkadarya region	Production of tile ceramic tiles from dolomite	million sq.m	1,5	22,4	60	11,1	58,8	Taking into account that in the mountainous areas of the region, the sun's rays fall vertically, in some settlements, due to the lack of electricity supply, it becomes necessary to produce solar panels. There are 2 small industrial zones in the area, a large potash fertilizer plant and an electrified railway.
46	Kashkadarya region	Production of solar panels	MW	40,5	8,3	65	12,1	58,8	The district is located in the south of our republic, adjacent (to Pakistan, India, Iran, etc.) given the use of light bicycles and scooters in the States, as well as high demand in the domestic market, it was found that there is a need for an electric scooter and bicycle assembly project. There is an opportunity to implement this project in small industrial areas in the district.
47	Kashkadarya region	Organizing the collection of electric scooters	thousand pieces	1,5	1,0	15	13	60	The complex of heating devices is called a heating system. It is divided into local and central heating. The central heating system consists of a heat generator (boiler), heating devices (radiators, registers) and heat paths (pipes). It is used in construction, oil and gas, chemical, heavy and light industries and other industries. In 2022, imports of these products amounted to 116.8 million US dollars. There is an opportunity to implement this project in small industrial areas in the district.
48	Kashkadarya region	Production of heating boilers	thousand pieces	10	1,0	15	11	51,6	The reserves of raw materials are concentrated 5-6 km northeast of the district center and amount to 797.0 thousand tons. Dolomitized lime is used in the production of glass (up to 200 kg per 1 ton of glass weight is added). The product is in great demand both in the domestic and foreign markets.

49	Kashkadarya region	Organization of production of glass containers	million pieces	75	34,6	85	9	63,6	There is an opportunity to implement this project on the basis of a cannery that does not operate in the neighborhood of maskur. There are 1000 acres of garden for raw materials. The product is in demand both in the domestic and foreign markets.
50	Kashkadarya region	Production of dietary fiber and dry pectin from fruits	thousand tons	1,17	11,5	260	12,9	56,4	Most of the population of the district is engaged in cattle breeding. Given this, it is possible to process wool obtained from small cattle and produce blankets. The product is in demand both in the domestic and foreign markets.
51	Kashkadarya region	Processing of wool and production of blankets from it	million kg	1	5,7	40	18,7	49,2	Tubular water heating equipment using solar energy is an alternative energy line based on the direct use of solar radiation to produce energy in any form. Solar energy uses a renewable energy source and has an advantage over other energy sources in that it is environmentally friendly", that is, it does not produce harmful emissions at the stage of active use.
52	Kashkadarya region	Production of tubular water heating equipment using solar energy	thousand pieces	12,5	1,5	15	16,4	52,8	There is an opportunity to implement this project in small industrial areas in the district."
53	Kashkadarya region	Production of sanitary ceramic products (sinks, bathtubs, etc.)	thousand pieces	100	2,3	11	15,2	54	Ceramic tiles are artificial ceramic products for wall decoration, interstory panels of buildings. It is widely used in construction. In 2022, the import of this product to various countries amounted to about \$ 21.9 million. US Dollar The reserves of raw materials are located 10 km south-east of the district center and amount to 8946.0 thousand tons. The product is in demand both in the domestic and foreign markets.
54	Kashkadarya region	Recycling of plastic containers	million kg	1,2	0,8	15	18,8	55,2	Plastic bottles-synthetic or natural high molecular weight compounds -are an organic polymer-based material. This product is used in household, automotive, medical and many other industries. In 2022, imports of plastic tableware and items will amount to 19.1 million. US dollars. The product is in demand in the domestic market.
55	Kashkadarya region	Production of crushed rubber tiles (used tires)	thousand sq.m	50	0,4	5	15,7	52,8	Vulcanized rubber products are widely used in all industries. The import of vulcanized rubber products in 2022 will amount to 41.7 million tons. US dollars. The product is in demand in the domestic market.
56	Kashkadarya region	Production of leather outerwear	thousand pieces	170	5,6	180	15,7	55,2	Thanks to the processing of leather and leather, it is possible to produce consumer goods, clothing, shoes and other types of goods. In 2022, imports of these products will amount to 7.1 million. US dollars. The product is in demand in the domestic market.
57	Kashkadarya region	Production of motor oils	thousand tons	12,36	5,0	67	2	60	Along with imports, domestic products are used. Imports of products from Western Europe, Russia and China are decreasing.
58	Kashkadarya region	Production of cheese from goat's milk	thousand tons	7	0,3	15	17,9	50,4	Most of the population of the district is engaged in cattle breeding. Given this, it is possible to process milk obtained from small cattle (goats) and produce elite cheeses. The product is in demand in the domestic market.

59	Kashkadarya region	Production of vegetable net from polyethylene	million pieces millionm	20	0,6	12	12,8	57,6	The agricultural network is mainly used in agriculture and is in the greatest demand in the segment of packaging vegetables and fruits. In such a package, it is possible to store the product in dry form and sage. In 2022, the import of networks for various purposes will amount to at least 1.5 million. US dollars. The product is in demand both in the domestic and foreign markets.
60	Kashkadarya region	Production of fiberglass fittings	million meters	1,3	0,6	9	13,5	56	The fiberglass composite is a fiberglass, the main element of which is fiberglass, and polymer binders are used as a binder. The proportion of fiberglass in the composition is 70%. In 2022, imports of these products to various countries will amount to at least 14.9 million. US dollars. The product is in demand both in the domestic and foreign markets.
61	Kashkadarya region	Production of dietary supplements from Ferula (mat).	million pieces	2,5	1,1	15	17,3	57,6	Medicines are made from the ferula plant. They have antispasmodic, analgesic, anthelmintic, antiseptic, diuretic and aphrodisiac properties. It is a promising raw material that is mainly used in the pharmaceutical industry. In 2022, the import of analgesics and other medicines will amount to 700 million. More than a US dollar. The product is in great demand in the foreign market.
62	Kashkadarya region	Production of auxiliary materials (colored crushed stone, nails, screws)	thousand pieces million m	425	0,6	10	11,6	58,8	These products are metal fasteners used in everyday life, at work, and in industry. These are standardized factory-made products used in construction, repair, manufacturing (mechanical engineering and other industries). During 2022, the import of this product will amount to 51.5 million tons. US dollars. The product is in great demand in the domestic market.
63	Kashkadarya region	Production of vinyl siding (PVC finishing material)	million meters	1,2	0,9	10	18,7	56,4	Vinyl siding is a PVC (polyvinyl chloride) wall covering. The standard length of the panel is 3.66 m. The product is in great demand in the domestic market. It is possible to produce products in a small industrial area.
64	Kashkadarya region	Processing of sawdust and agricultural waste into fuel briquettes	tons	444	0,3	10	17,8	50	Given the large number of livestock, it is possible to produce more than 1,000 tons of fuel briquettes per year from their waste. This project is a pilot in the area and has the possibility of production in a small industrial area. The product is in great demand in the domestic market.
65	Kashkadarya region	Production of baby diapers	million pieces	130	3,4	12	15,7	58	These products are used in daily life, for newborns and infants. In 2022, the import of this product will amount to about 1.5 million. US dollars. The product is in great demand in the domestic market.
66	Kashkadarya region	Production of PVC coated gloves	thousand pieces	250	0,2	8	15,6	52,8	There is a demand for this product in the area instead of imports for construction work.
67	Kashkadarya region	Production of polyethylene bags (salafan bags).	million pieces	4	0,4	12	17,7	50,4	Plastic bags are a common type of packaging. In practice, they can compete with rigid shipping containers by replacing soft containers such as paper and fabric bags. The product is in great demand both in the domestic and foreign markets.
68	Kashkadarya region	Production of carpets from natural and artificial yarns	thousand sq.m	600	4,1	25	15,7	54	Thanks to the development of modern technologies, synthetic materials have become more qualitative and practical. Some products from this type of raw material are of the same quality as wool and other natural materials. Given that there are a lot of small cattle in the area, and a gas chemical complex operates in the border area, it is possible to weave carpets from wool and pellets. The product is in great demand both in the domestic and foreign markets.

69	Kashkadarya region	Modular plastic production	thousand m cubic	84,5	1,3	60	23,4	50,4	Modular plastic covers, like many other useful and practical things, came to us from the West. They have started to be widely used recently, so we still perceive them as an innovation. This plastic coating is durable, it is resistant to heat, cold or moisture. Ideally, from the point of view of ecology, such coatings can be laid on any flat surface, repeatedly assembled and disassembled or transferred from place to place without dismantling. Given that a gas chemical complex operates in the district, sulfates can be produced from granules. The product is in great demand both in the domestic and foreign markets.
70	Kashkadarya region	Footwear production	million couple	1,6	6,1	100	12,2	84	The population of the district is 156 thousand people, of which 79.4 thousand are men and 76.9 thousand are women, and given the high population density in neighboring districts and regions, it is possible to produce leather shoes and other types of products. The product is in great demand both in the domestic and foreign markets.
71	Kashkadarya region	Production of dry fodder (livestock)	thousand tons	7,5	0,8	19	23,2	84	Most of the population of the district is engaged in cattle breeding. In the district in 2021 1 billion in 2022, livestock products worth 1.2 billion rubles were produced. Naturally, the number of livestock is growing, and the demand for it is increasing from year to year. However, the area of land allocated for livestock remains unchanged. In these cases, the issue of an intensive increase in the feed base for livestock is raised. This project will help solve part of this issue. The product is in demand both in the domestic and foreign markets.
72	Kashkadarya region	Establishment of a mushroom farm for the cultivation of champignons	Acres	17	2,6	50	24,5	72	If we consider that the main part of the territory of the district is mountainous, then there are few mushrooms for consumption by the population. Mushroom is a very useful plant species for the human body. This project to create a mushroom farm for growing champignons will greatly benefit the area and surrounding areas. The product is in demand in the domestic market.
73	Kashkadarya region	Multi-functional roadside service complex	million doll	2,2	2,8	30	12,9	84	Dehkanabad district is located in the south-east of Kashkadarya region. It borders Guzar district in the northwest, Kamashinsky district in the northeast, Surkhandarya region in the southeast, and Turkmenistan in the West. On the territory of the district, 57 km of the site form an international highway. The district has a sufficient amount of infrastructure on the M-39 highway with access to other regions and countries through Karshi, Samarkand and Surkhandarya districts, as well as to world markets. In this regard, it is planned that this project will be organized on the side of the M-39 Surkhandarya-Tashkent highway.
74	Kashkadarya region	Production of polymer-sand tiles	thousand sq.m	48	0,3	7	10,8	61,2	Even a smaller, but about half the size of this product costs practically nothing, which has a very positive effect on the side of the buyer's interest — the price. Roofs that will be covered with such a product will be much cheaper than ceramic and slate ones, and it will last the same amount. It is impossible not to note the color advantages of the polymer-sand coating. Its diverse range is much richer, which gives customers the opportunity to choose and develop great ideas for designers. The product is in demand both in the domestic and foreign markets.
75	Kashkadarya region	Production of flexible finishing material on a synthetic basis (flexible stone)	thousand sq.m	50	0,2	8	25,2	42	Artificial finishing materials are artificial structures, finishing slabs and blocks using large and small fillers, binders and color additives. This is a type of product that is in great demand in the modern construction sector. In 2022, imports of these products to various countries will amount to at least 28.4 million. US dollars. The product is in demand both in the domestic and foreign markets.
76	Kashkadarya region	Mattress manufacturing shop	thousand pieces	50	0,2	15	14	72	In the furniture industry, mattresses are the most integral part. No sofa bed without diarrhea will be diarrhea. Sofas and furniture with mattresses are in great demand among residents of cities and villages. The project also has the possibility of production in small industrial areas. The product is in demand both in the domestic and foreign markets.
77	Kashkadarya region	Production of sandwich panels	million m	200	2,6	50	18,3	50,4	A sandwich panel is a building material having a three-layer structure consisting of two layers of solid material (metal, PVC, fiberboard, magnesite plate) and an insulating layer between them. Depending on the purpose, it can be used as roofing and wall panels. In 2022, imports of these products to various countries will amount to at least 40.4 million. US dollars. The product is in demand both in the domestic and foreign markets.

78	Kashkadarya region	Mining and processing of dolomite and other rocks (by different fractions).	thousand tons	518,4	3,3	45	18	50	The reserves of dolomite rock in the Dehkanabad and Guzar districts amount to 113577.0 thousand tons. Given the presence of large construction projects in the Kashkadarya region and neighboring regions, this product is in great demand in the domestic market.
79	Kashkadarya region	Plasterboard production	million sq	5	4,1	20	18,1	49	Drywall is widely used in the construction industry. The reserves of raw materials are located 6 km northeast of the district center and amount to 800 thousand tons. The product is in demand both in the domestic and foreign markets.
80	Kashkadarya region	Septic (sewage) production	.mm pieces	400	0,6	5	11,7	58,8	The production of this type of product has structural raw materials in the district and surrounding areas
81	Kashkadarya region	Production of table salt and technical salt	thousand tons	84,48	4,7	45	14,3	55,2	The reserves of table salt in the area amount to 28.8 thousand tons, the reserves of technical salt-53.7 thousand tons. Domestic demand is being met in full. The USA, China, Japan, Korea and Germany are the largest importing countries.
82	Kashkadarya region	Production of juice and concentrate from polys products and organization of refrigeration capacity	tons	900	2,1	80	16,8	50	9 thousand tons of melons are grown in the area. It is not recyclable. The United Kingdom, France, Oman, Canada and China are major juice importing countries.
83	Kashkadarya region	Organization of drying and packaging of vegetables	thousand tons	1,1	3,0	53	13,2	56,4	More than 30 thousand tons of vegetables are grown. It is expected that 20-25% of the products will be processed within the framework of this project.
84	Kashkadarya region	Pumpkin pectin production	thousand tons	1,17	11,5	260	9,6	62,4	Growing zucchini does not require a lot of water, it is possible to grow them on the edges of fields. From pumpkin, 0.3-1% of the pectin substance can be obtained. Russia has about 90 million per year.imports dollar-value pectin (2015). The United States and China are leading the list.
85	Kashkadarya region	Production of beet sugar	thousand tons	5	2,3	65	33,1	60	Beetroot grown in the district contains enough glucose. There are lands for its cultivation and the possibility of industrial processing. The leading importing countries (2021) are Switzerland (\$23 million), the Czech Republic (\$12 million) and Denmark (\$6 million).the doll.)
86	Kashkadarya region	Production of fodder for chickens and birds	thousand tons	15	2,3	50	15,8	52,8	Along with imports, domestic products are used. In agriculture, the problem of the food supply is partially solved, which is mainly a problem in veterinary medicine. It is focused on the domestic market.
87	Kashkadarya region	Production of ketgut for medicinal purposes	thousand tons	230,4	6,6	75	17,4	50,4	The main raw material for the production of catguts is collagen, obtained from the serous or submucosal layer of the small intestine of cattle, sheep and goats. There are enough cattle and small cattle in the province. Basically, there is an opportunity to reduce imports, with the USA, Brazil, Italy and Germany being the leading importing countries.

88	Kashkadarya region	Industrialized wool carpet production	thousand sq.m	1,5	0,2	15	18	36	Meat production in the territory is 18.6 thousand tons per year in live weight. In parallel, it is proposed to organize a farm of meat breeds of sheep, for example, dorpers. There are about 100,000 head of cattle and 600,000 head of small cattle in the area.
89	Kashkadarya region	Production of iodine and bromine	thousand pieces	254	9,7	223	11,7	57,6	There are large reserves of iodine and bromine in the area. Bromine in the form of bromides contained in drilling waters is obtained by treating the reaction mixture with chlorine at pH = 3.5 to prevent the formation of bromine oxoacetate salts. It is expected to focus on the domestic market and reduce imports in the pharmaceutical sector.
90	Kashkadarya region	Production of dry milk mixture	tons	300	1,5	12	7,7	66	About 65 thousand tons of milk are produced in the district, about 300 tons (0.5 percent) are processed. With the introduction of the standard for 0.75 liters of milk per day per person, the population will need 36 thousand tons of milk per year (55% of the volume).
91	Kashkadarya region	Production of vegetable oil	thousand tons	7,2	1,4	30	17	49,2	Imports from Kazakhstan and Russia are expected to decrease if production is established. There are lands for its cultivation and the possibility of industrial processing. The leading importing countries (2021) are India (\$2.4 billion) and China (\$1.3 billion).
92	Kashkadarya region	Production of heat-retaining (heat-insulating) materials from glass waste using new technologies	thousand tons	6	5,4	32	23,1	37	Imports from China and Russia are expected to decrease if production is adjusted. Quartz reserves are available in the province. It leads to energy savings.
93	Kashkadarya region	Production of bags for agriculture	million pieces	15	0,9	7	13,9	56,4	There are enough raw materials in the region. In addition, recycled municipal solid waste should also be considered as raw materials.
94	Kashkadarya region	Lithium mining and processing	thousand tons	3,7	72,5	120	35,3	50	The annual lithium reserve in the region is 55 tons. Lithium is currently an indispensable substance for electric car and phone batteries
95	Kashkadarya region	Production of disposable containers (from paper, plastic and metal-aluminum)	million pieces	18,6	0,4	14	31,6	55	It is expected that mainly domestic raw materials (paper and plastic) will be produced. It is focused on the domestic market, there is demand.
96	Kashkadarya region	Production of thermoses of various sizes	thousand pieces	115	0,9	17	12,3	57,6	There are enough raw materials in the region (primarily quartz). It is directed to the domestic market, which leads to a reduction in imports from China
97	Kashkadarya region	Production of electrodes for the construction industry	thousand tons	3	1,5	10	19,7	49,2	Along with imports, domestic products are used. Imports of products from Russia and China are decreasing. There is still high demand in the area where the construction industry is developing.

98	Kashkadarya region	Organization of production of orthopedic, gel and other new types of mattresses	thousand pieces	5	0,4	12	17,3	51,6	Along with imports, domestic products are used. Imports of products from Russia and China are decreasing. Demand among the population is expected to remain high.
99	Kashkadarya region	Production of air conditioners and fans	thousand pieces thousand pieces million pieces million pieces	24,9	2,4	45	12,4	58,8	Raw materials are imported and collected in the provinces. A value chain is being created in which the population is employed.
100	Kashkadarya region	Production of car filters	million pieces thousand pieces	1	1,1	61	10,9	61,2	The demand in the republic is high, each car must update the filter every 15-30 thousand km. Production of air, oil and fuel filters is expected. It is redirected to the domestic market, and imports are reduced.
101	Kashkadarya region	Production of household buttons, zippers and other imported consumer goods	million pieces	11,1	0,8	81	12,1	57,6	The raw material base (remnants of oil refining) of the region is used. Competition is being created for imported products from Russia, China and Turkey. It is focused on the domestic market.
102	Kashkadarya region	Production of electrical products (sockets, switches).	million pieces	1,36	1,6	20	38,1	58	Imports from China, Turkey and Russia will decrease, this amount will be about 34 million. Per year. dollars. It is focused on the domestic market, there is demand.
103	Kashkadarya region	Production of artificial leather shoes	thousand pieces	1,1	3,8	100	11,6	58,8	Raw materials are imported and processed in the area. A value chain is being created in which the population is employed. Exports to Russia and Kazakhstan are expected.
104	Kashkadarya region	Production of plastic plinths and other building products for construction, laminate production	million kg	1	1,5	80	20	49	The raw material base (remnants of oil refining) of the region is used. Competition is being created for imported products from Russia, China and Turkey. It is focused on the domestic market.
105	Kashkadarya region	Production of LED lamps	million pieces	1	0,7	15	12	60	Along with imports, domestic products are used. Imports of products from Russia and China are decreasing.
106	Kashkadarya region	Organization of production of perfumes	million pieces	1,7	1,0	35	15,9	54	Imports from China, Turkey and Russia are declining, and raw materials are imported from the Republic and from abroad. It is focused on the domestic market, there is demand.
107	Kashkadarya region	Iodine processing (drugs)	thousand tons	22	1,8	14	8,5	63,6	Iodine reserves in the area are being processed. This leads to a reduction in imports.

108	Kashkadarya region	Production of wheelchairs and bicycles for the disabled	thousand pieces	5	0,7	15	8	60	Mainly domestic raw materials are used. It is focused on the domestic market. It will replace Russian and Chinese imports.
109	Kashkadarya region	Production of circular pumps for home and industry	thousand pieces	24	1,7	75	19,1	50,4	In order to save energy resources, the need for circulation pumps on a domestic and industrial scale is increasing. It can compete with products from China, Russia and European countries.
110	Kashkadarya region	Production of pens and other stationery	a million pieces	3,9	0,7	45	21,5	45,6	The raw material base (remnants of oil refining) of the region is used. Competition is created by imported products, which are mainly produced from China. It is focused on the domestic market.
111	Kashkadarya region	Production of varnish and paint products	thousand tons	4,8	1,6	12	20,1	50,4	Raw materials are imported and processed in the area. A value chain is being created in which the population is employed. It is focused on the domestic market.
112	Kashkadarya region	Production of plastic products for the transportation or packaging of goods (pallets, packaging covers, plastic covers for bottles, bottles and cans)	thousand pieces	144	1,2	12	14,9	56,4	The raw material base (remnants of oil refining) of the region is used. Competition is created by imported products, which are mainly produced from China. It is focused on the domestic market.
113	Kashkadarya region	Production of protective means for plants	thousand tons	2	1,6	15	17,6	50,4	Along with imports, domestic products are used. It leads to an increase in agricultural yields. It is focused on the domestic market.
114	Kashkadarya region	Production of strollers and toys for children	thousand pieces	166	4,7	22	15	60	Mainly domestic raw materials are used. It is focused on the domestic market. It will replace Russian and Chinese imports.
115	Kashkadarya region	Development of tiles from recycled rubber	thousand tons	2	0,1	10	7,8	25,2	Mainly domestic raw materials are used. It is focused on the domestic market. It will replace Russian and Chinese imports.
116	Kashkadarya region	Breeding and processing of fish in Lake Sechankol	thousand tons	1,2	9,9	60	13,5	56,4	It is expected that it will be grown and processed from the natural reservoirs of Sechankol and Achin, which occupy 7 thousand hectares located in the district.
117	Kashkadarya region	Production of basalt slates with an alternative sand-cement mixture in construction	thousand pieces	900	1,6	15	16,7	52,8	The raw material base in the region is used (sand in the area, cement in the area). Among the advantages of the product are cold resistance and heat resistance, as well as long-term use. It is focused on the domestic market.

118	Kashkadarya region	Production of vacuum cleaners and hair dryers	thousand pieces	75	2,6	77	16,1	52,8	Raw materials are imported and processed in the area. A value chain is being created in which the population is employed. It is focused on the domestic market.
119	Kashkadarya region	Development of finished leather products - suitcases, bags and other items	thousand pieces	75	2,6	27	15	54	The raw material base of the region (slaughtered cattle and small cattle) is used. Competition is being created for imported products, which are mainly produced from Pakistan, Turkey, and China. It is focused on the domestic market.
120	Kashkadarya region	Production of televisions and monitors	thousand pieces	60	4,9	10	8,7	64,8	Raw materials are imported and processed in the area. A value chain is being created in which the population is employed. It is focused on the domestic market.
121	Kashkadarya region	Development of animal husbandry, production of feed products for livestock.	thousand tons	10	9,1	140	11	50	The district specializes in animal husbandry, today there are 110 thousand heads of cattle, 541 thousand heads of small cattle (sheep and goats), 3.8 thousand heads of horses and camels, although the production of feed for them has not been established. Due to the fact that cattle feed is imported from other districts and regions, the growing demand leads to the fact that a building for the construction of an animal feed plant is empty on the territory, communication networks are required
122	Kashkadarya region	Solar panels and natural resources (wind) production project.	thousand pieces	600	23,5	44	12	45	Due to the geographical location of the area, natural climatic conditions with 320 sunny days per year and year-round wind, as well as the availability of sufficient land area for the project
123	Kashkadarya region	Setting up a Logistics Center. In the direction of A 380.	mln.som	13000	3,2	23	15	53,92	The A-380 Karshi-Bukhara road of international importance passes through the district. Given the abundance of roadways on this road, there are ample opportunities for organizing a complex of infrastructure facilities on its sections in the district.
124	Kashkadarya region	Production of compressed gas cylinders for vehicles	thousand pieces	80	2,4	50	13	38	The products are fully imported into the republic. Availability of social infrastructure for production, high demand on the territory, empty construction facilities, communications for the project
125	Kashkadarya region	On the production of carpets from synthetic granules	thousand sq.m	2,5	0,6	55	8	54	The products are imported from other regions of the republic. There are empty building structures on the territory, necessary communication networks for the construction of a production plant
126	Kashkadarya region	Production of blankets from wool obtained from livestock	thousand pieces	40	1,1	26	12	36	Due to the high demand for blankets in the area and the low cost of raw materials, an empty building for the construction project
127	Kashkadarya region	Production of decorative items from leather	thousand pieces	22	1,1	30	15	33	Availability of infrastructure for production, there are experienced business entities producing polyethylene pipes in the area

128	Kashkadarya region	Production of shoes and soles	thousand pieces	20	1,0	15	14	52	An empty building for the construction project, communication networks, accurate accounting books for obtaining raw materials for products are available
129	Kashkadarya region	Armature production	thousand tons	20	1,3	30	14	38	The presence of high-voltage gas in the zone and the presence of a metal assembly base. High demand in the foreign and domestic markets, empty building structures for the project, communication networks, clear ledgers for obtaining commodity raw materials
130	Kashkadarya region	Production of tarps for modern cars from Oltingurgut	thousand pieces	1,3	0,3	20	15	43	Availability of sulfur reserves of 300-400 thousand tons per year from the Mubarak gas processing plant, availability of infrastructure for production
131	Kashkadarya region	Canned food (Tomato paste, caviar, Ketchup,)	thousand tons	1,4	1,0	30	13	37	The availability of infrastructure for production, the availability and proximity of raw
132	Kashkadarya region	Production of brake pads for cars,	thousand pieces thousand pieces	112	3,2	30	15	48	materials, the Republic is fully imported. The growing demand in the territory is due to the presence of empty building structures, communication networks, and accurate accounting books for the production of commercial raw materials.
133	Kashkadarya region	Production of kitchen utensils from stainless steel	thousand pieces	600	0,4	27	20	42	There are clear accounting books for the project on land resources, communications, and obtaining raw materials for products
134	Kashkadarya region	Polish, Czech production of cars and vehicles	thousand pieces	1,4	1,0	30	25	41	Availability of social infrastructure for production, high demand in the territory, empty construction facilities for the project, communication networks, clear ledgers for obtaining commodity raw materials
135	Kashkadarya region	Aluminum cans (for soft drinks)	a thousand pieces	252	51,0	72	18	45	The region is in high demand both in the western and central regions of the republic, the availability of infrastructure for production is in high demand in the region
136	Kashkadarya region	Chemical agent for agriculture (Sulphur)	a thousand tons	58	0,7	30	20	42	Availability of sulfur reserves, availability of infrastructure for production, growing demand in other regions of the republic
137	Kashkadarya region	Plastic tara (green, all sizes)	tons	252	0,1	25	21	34	An empty building for the construction project, communication networks, accurate accounting books for obtaining raw materials for products are available

138	Kashkadarya region	Polythene plastic plugs, caps, caps and other types of sewing items:	a thousand pieces	400	0,6	35	24	48	Availability of infrastructure for production, high demand in the territory, empty building structures for the project, communication networks, clear ledgers for obtaining raw materials for products
139	Kashkadarya region	Bag production (onion, flour, sugar, cement, pasta)	a thousand pieces	600	0,6	32	35	56	The growing demand in the territory is due to the presence of empty building structures, communication networks, accurate accounting books for obtaining raw
140	Kashkadarya region	Corrugated box (all sizes)	a thousand pieces	230	0,2	20	23	43	materials, landscaping, communal infrastructure
141	Kashkadarya region	Paper, napkins (wet napkins, printed papers, disposable paper cups)	a thousand pieces	620	1,6	12	23	60	The growing need for the territory, the availability of social infrastructure
142	Kashkadarya region	Production of concrete from sulfur	a thousand tons	25	24,0	10	14,6	30	Availability of sulfur reserves, availability of communal infrastructure for production
143	Kashkadarya region	Plastic containers, Bakalashka, (all sizes)	a thousand pieces	550	0,8	20	24	41,31	Manufacturing enterprises in this area can purchase bidish and other custom containers from other regions, due to the low cost of raw materials and ease of delivery,
144	Kashkadarya region	Profiles and bars Production of profiles for greenhouses, production of PVC profiles	a thousand tons	4	1,0	40	33	46,62	High demand in the territory, a large number of greenhouses, availability of infrastructure for production, high demand in the territory, an empty building for a design project, communication networks, clear ledgers for obtaining raw materials for products
145	Kashkadarya region	Production of bicycles and spare parts (wheels, rollers,)	a thousand pieces	6	1,9	42	26	42	Import to all regions and Republics, welfare of communal and social infrastructure in the area,
146	Kashkadarya region	Expansion of production of spare parts for industrial and agricultural machinery.	a thousand pieces	2,1	2,0	20	35	32	An empty building for the construction project, communication networks, accurate accounting books for obtaining raw materials for products are available
147	Kashkadarya region	Bag production (assortment)	thousand pieces	1,5	1,1	22	40	31	The share of imports in all industries of the region and the Republic, the welfare of the communal and social infrastructure of the district,

148	Kashkadarya region	Production of windows for cars and vehicles	thousand pieces	74	1,8	15	58	34	The high share of imports is due to increased demand across the republic, the availability of communal infrastructure for production
149	Kashkadarya region	Processing of waste paper and production of cardboard products	thousand tons	17	1,4	20	53	35	An empty building for the construction project, communication networks, accurate accounting books for obtaining commercial raw materials are available
150	Kashkadarya region	Chips from potatoes and production, packaging	thousand tons	175	0,2	42	35	42	For the project of an empty building of structures, communication networks, there are clear accounting books for obtaining commodity raw materials. Availability of a project initiative
151	Kashkadarya region	Corrugated pipe production (protection pipes)	thousand tons	2500	0,2	32	30	42	There is a high demand for small businesses to produce and import empty building structures, communication networks, and raw materials from other district and regional centers
152	Kashkadarya region	Production of sockets, tees, switches and other electrical devices	thousand pieces	4	2,0	20	32	40	100% import, low cost of raw materials, availability of infrastructure N
153	Kashkadarya region	Production of internal cables for led lamps (light emitting diodes).	a thousand pieces	1,6	1,2	20	27	53	Availability of infrastructure for production, availability of a project initiative.
154	Kashkadarya region	Production of matter from Raykhan	a thousand liters	1400	0,2	15	45	33	Availability of a project initiative
155	Kashkadarya region	Organization of production of milk and dairy products (yogurt, brinza, cheese, kefir)	thousand liters	97	0,1	27	23	41	The absence of such an enterprise in the area, the growing demand
156	Kashkadarya region	Production of modern aluminum door frames	thousand pieces	2,5	0,2	20	30	40	The presence of high-pressure gas in the area is due to the growing demand in the region and the area, the availability of infrastructure for production
157	Kashkadarya region	Production of metal clothes dryers	thousand pieces	25	0,2	30	36	36	As an electrolyte in metalworking, the petroleum industry, the paint industry, the production of artificial fibers, explosives, hydrochloric acid, lead batteries

158	Kashkadarya region	Samarez production (samarez, bolt, nut, dowel nail production)	thousand tons	3,6	7,2	95	25	46	An empty building for the production of structures, communication networks, there are accurate accounting books for obtaining commodity raw materials, based on another order from district entrepreneurs
159	Kashkadarya region	Production of batteries from sulfur:	thousand pieces	3	3,0	17	21	52	Availability of sulfur reserves of 300-400 thousand tons per year from the Mubarak gas processing plant, availability of infrastructure for production
160	Kashkadarya region	Chocolate production	thousand pieces	65	0,1	20	40	30	An empty building for the construction project, communication networks, there are accurate accounting books for obtaining commodity raw
161	Kashkadarya region	Production of fodder for livestock and poultry factories	thousand tons	15	0,1	15	32	47	materials Growing demand in the territory for production, lack of production facilities in the area, an empty building for the construction project, communication networks, food raw materials
162	Kashkadarya region	Organization of a production complex for canned goods (tomatoes, cucumbers, etc.).	thousand tons	5	2,2	25	24,4	25	7072.7 tons of fruits and berries are grown in the area. No waste recycling activities. This project can be implemented in the terminal building belonging to the target Cotton Gin plant. The building is currently empty
163	Kashkadarya region	Establishment of a modern medical clinic	place	50	5,6	81	20,6	89	Nuriston Mfy, Uzbekistan str., 20 the building "part of the hospital building with 150 beds" (Tsq) was put up for sale at an electronic auction. The building is fully equipped with infrastructure. If there is a potential entrepreneur, you can repair and equip the building and create a modern medical clinic
164	Kashkadarya region	Establishment of a gypsum processing plant (plasterboard, water emulsion, plastering and finishing mixture used in construction)	thousand sq.m	25	7,1	45	11,7	80	The district has 2.8 million tons of gypsum products on an area of 22 hectares. The production of 22 thousand tons of finishing plaster, 2 million square meters of drywall and other gypsum products can be established per year. In accordance with Resolution No. 4 of the Ministry of Mining and Geology of the Republic of Uzbekistan dated 04/18/2023, a 46-hectare plot of land with gypsum reserves in the Nishan district was put up for electronic auction
165	Kashkadarya region	Organization of milk processing	thousand tons	4	9,6	34	26,2	50	The district produces 52.2 thousand tons of milk per year. The mfy govur Village icon of the milk processing building at 18 stands at Ye auction. Put up for auction on 07.10.2022. Milk processing equipment is installed in the building. The auction price is 1630.0 mln.so 'm
166	Kashkadarya region	Establishment of a poultry complex and processing of poultry meat (diet meat, semi-finished products)	thousand tons	1	3,1	25	10	40	There are 370,620 head of poultry in the area. There is a poultry farm for 30 thousand heads on the territory of the Nuristan MFC
167	Kashkadarya region	Organization of fruit and vegetable processing (drying, packing).	thousand tons	7,5	2,8	20	15,9	20	About 10 thousand tons of fruits and vegetables are grown in the area. This project can be implemented on the territory of the Nuristan MFC. The territory is fully equipped with infrastructure

168	Kashkadarya region	Organization of production of various plastic pipes and fittings	thousand tons	3,2	1,8	50	20	25	This project can be implemented on the territory of the Nuristan MFC. The territory is fully equipped with infrastructure
169	Kashkadarya region	Organization of cultivation of peanuts and production of peanut paste	tons	840	0,7	15	54,5	15	The climate and soil of this area are favorable for growing peanuts. This project can be implemented in a production facility. KSZ t'mined with infrastructure
170	Kashkadarya region	Organization of production of modular plastic molds (plastic pillar molds).	thousand pieces	250	1,3	20	25,7	20	There are structural raw materials for the production of this type of product on the territory. This project can be implemented in Koksoy KSZ. KSZ t'mined with infrastructure
171	Kashkadarya region	Organization of production of different types of bearings	thousand pieces	250	10,0	45	12	54	Agro SUV TEX montage LLC in 2022 for a total of US\$ 2,950, mlrd.so 250 units of "spare parts for water pumps" (bearings) were manufactured. It is also included in the localization program. The company carries out permanent activities on a contractual basis with the management for the use of the oncoming main channel.
172	Kashkadarya region	Organization of production of heat-insulating plates	thousand sq.m	20	0,8	35	22,5	35	There are structural raw materials for the production of this type of product on the territory. This project can be implemented at the newly created Nurchi KSZ. KSZ is supported by the infrastructure
173	Kashkadarya region	Organization of production of plastic products for product packaging	thousand tons	55	0,6	14	22,7	14	There is a great demand for packaging of agricultural products. E-it is possible to sell in buildings that are at auction.
174	Kashkadarya region	Organization of production of building materials (varnish and paint).	thousand tons	320	0,5	8	24,7	8	There are structural raw materials for the production of this type of product on the territory. This project can be implemented in Koksoy KSZ. KSZ t'mined with infrastructure
175	Kashkadarya region	Organization of packaging and export of honey	thousand tons	300	0,5	30	22,2	10	There are structural raw materials for the production of this type of product on the territory. There is an empty avtogarazh building on the territory of the Samarkand MFC. The building is up for auction. The land plot is 1.29 hectares, the built-up area is 1953.7 sq. m.meter
176	Kashkadarya region	Organization of production of ketchup and tomato paste	thousand tons	1,5	0,2	10	59,2	10	About 10 thousand tons of fruits and vegetables are grown in the area. This project can be implemented on the territory of the Nuristan MFC. The territory is fully equipped with infrastructure
177	Kashkadarya region	Organization of production of leather products	thousand tons thousand	120	1,6	40	16,3	25	The number of cattle in the area is 128,573 heads. 17.9 tons of meat products were produced. There are stocks for leather goods production activities

178	Kashkadarya region	Organization of the production of wet wipes	tons thousand tons	1,2	1,0	6	36,5	15	There are opportunities for further development of fishing in the Talimarjan reservoir. The newly created beam can be implemented in CS
179	Kashkadarya region	Organization of potato processing (chips).	thousand tons	1,5	1,3	30	13,86	65	There are structural raw materials for the production of this type of product on the territory. This project can be implemented in the KS "Koksoy". Potatoes are grown in the area on 100 hectares of land
180	Kashkadarya region	Organization of production of fruit preserves for children	thousand tons	5	5,2	34	43,73	34	7072.7 tons of fruits and berries are grown in the area. No waste recycling activities. The 100% state share of Nishon Tuman Wine Trade LLC is located on the territory of IFC Navbahor, which is traded at an electronic auction. If there is a potential entrepreneur, then this project can be implemented by repairing and equipping the building.
181	Kashkadarya region	Organization of production of prefabricated elements of greenhouses	thousand tons	1,2	1,8	20	23,1	20	There is demand, but domestic consumption is high. This project can be implemented on the territory of the Nuristan MFC. The territory is fully equipped with infrastructure
182	Kashkadarya region	Organization of production of wooden composite plates from rough plant stems	thousand tons	500	1,2	180	42,2	10	In the regions, it is possible to effectively use the remnants left after growing agricultural products (cotton, straw, hay, turf, etc.). There is a "repair shop and auxiliary premises" on the territory of the Navbakhorsky MFC. The land plot is 0.78 hectares, the building area is 2536.3 sq. m.meter
183	Kashkadarya region	Establishment of an agrolistics center	mln.som	45000	0,8	20	20,2	16	There is a central storage and distribution warehouse for Target mfy mineral fertilizers at 20 Tullimarjon Road. This building has been put up for electronic auction. The land plot is 6.5 hectares, the built-up area is 7196.08 sq. m.meters.
184	Kashkadarya region	Organization of production of greenhouses	thousand sq.m	30	1,2	18	21,2	20	There is demand, but domestic consumption is high. There are buildings on display at ye-Auction in the mfy Peace area. The territory is provided with infrastructure
185	Kashkadarya region	Establishment of a hotel	mln.som	2500	2,0	30	18,36	21	There is a building where empty land is used inefficiently. There are buildings on display at ye-Auction in the mfy Peace area. The territory is provided with infrastructure
186	Kashkadarya region	Organization of cable production	million m	140	1,5	35	28,16	20	There is demand, but domestic consumption is high. The newly created beam can be implemented in CS.
187	Kashkadarya region	Organization of production of solar panels	MW	40	1,5	30	27,6	48	Availability of demand and high domestic consumption. FES is being built on 903 acres of land in the area. For the implementation of this project, there is both a land plot and infrastructure on the territory of the Nuristan MFC. The TALLIMARJON TPP JSC is located on the territory

188	Kashkadarya region	Organization of production of water pumps	thousand pieces	2,1	1,8	20	18,37	36	The district has a Department for the use of the Karshi Main Canal on the border with Turkmenistan. The territory is fully equipped with infrastructure. Such enterprises as Agro Voda Technomontazh LLC, Special Large Pump Repair LLC, Production Technological Equipment Management LLC carry out activities in this area
189	Kashkadarya region	Organization of floral paper production	million sq.m	2,3	7,0	18	10	60	Availability of demand and high domestic consumption. E-it is possible to sell in buildings that are at auction.
190	Kashkadarya region	Organization of the production of thin finishing coating plates	thousand sq.m	1,3	3,0	30	30,3	60	There are structural raw materials for the production of this type of product on the territory. There is a "repair shop and auxiliary premises" on the territory of the Navbakhor MFC. The land plot is 0.78 hectares, the building area is 2536.3 sq. m.meter
191	Kashkadarya region	Organization of production of various generators	thousand pieces	6	6,0	20	17,48	58	The organization of production of this type of product in the area is not established. This project can be implemented in a small industrial area, which will be created on the territory of the Koksoyskaya MFO. KSZ comes with a complete infrastructure.
192	Kashkadarya region	Organization of metal welding electrode production	million pieces	80	0,7	30	42,3	38	There is demand, but domestic consumption is high. There are buildings on display at ye-Auction in the myf Peace area. The territory is provided with infrastructure
193	Kashkadarya region	Organization of production of disposable containers	thousand tons	2	0,4	20	20,61	58	There is demand, but domestic consumption is high. There is an empty avtogarazh building on the territory of the Samarkand MFC. The building is up for auction. The land plot is 1.29 hectares, the built-up area is 1953.7 sq. m.meter
194	Kashkadarya region	Organization of production of mixed fodder for livestock and poultry	thousand tons	6	1,5	80	59,13	25	Availability of demand and high domestic consumption.
