

## PROJECT PASSPORT

Project name	Growing amaranth using moisture-saving technologies and producing high-protein feed products for livestock farming
Initiator	LLC "GOLD AMARAND BIG 62"
Director	B. Khakkulov + 998 (99) 613 01 62
Project location	Republic of Karakalpakstan, Muynak district
The cost of project	\$4.5 million
Contribution to the project by the initiator	\$0.75 million
Foreign direct investment is required	\$3.75 million
Another source of project funding	\$0 million
Average annual production capacity	50000 tons
Average annual sales revenue	\$3.04 million
NPV	\$9.17 million
IRR	32.58%
PP	42 months
Of these, buildings and structures	Available
Existing land	600 ha
Export	\$1.8 million
Number and types of jobs created	55 jobs
Brief description of the project	The initiator proposes the cultivation of high-yielding and high-protein amaranth crops using moisture-saving technologies. The resulting products, both in the form of green mass and in the form of seeds, will be subject to processing, and therefore it is necessary to purchase equipment. High-protein and additive-enriched feed products are export-oriented.

*We are ready for further cooperation and implementation of joint investment projects.*
