## Production of biogas and fertilizers based on organic agricultural waste

Considering that 80% of cars in Uzbekistan already use natural gas (CNG) as a motor fuel, there is huge potential for developing the use of biogas (BIOCNG) as a cheap fuel alternative. In conditions of high demand and limited supply, especially in winter period, it is planned to produce and sell BIO CNG worth more than \$900,000 per year

 Capacity: 3.5 million cubic meters

 Project Cost : \$ 3.13 million

 Need for investment : \$ 3.13 million

 IRR: 20,1, %

 NPV: \$ 3,1 million

 PP: 5,9 year

 Location: Jizzakh region, Gallaaral district
